

Trashing images and emptying the trash with one click

While browsing through images you have shot in Leaf Capture, you might want to quickly get rid of shots, without having to then go and empty the trash, adding another step to editing.

If you are sure you want to delete images for good, without having the option of recovering them, follow these simple steps:

1. Click on an image in the preview window
2. Hold down the ALT key on the keyboard and press the trash button on the right of the preview window.

NOTE: as you hold down the ALT key and you move the mouse over the Trash icon, you will see a blue grim reaper icon.

This is to warn you that the file you are trashing will be deleted for good.
